

# PARKING SPACE DIMENSIONS CITY OF GLENDALE PLANNING DEPARTMENT

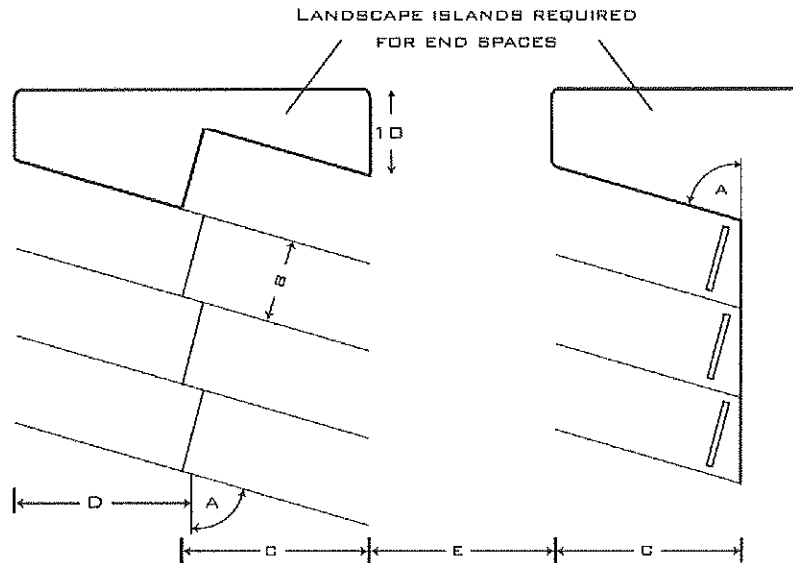

## 90° PARKING

### Glendale Requires 10-foot by 20-foot Parking Stalls

The City of Glendale requires 10-foot wide by 20-foot deep parking stalls for all new parking lots in the City. The City also requires that existing parking lots that are repaved, or restriped, be repainted so that the parking stalls are 10 feet by 20 feet. It is important that the dimensions of parking stalls be large enough to accommodate the largest motor vehicles on the road. This is particularly important in commercial shopping centers where patrons are often juggling shopping carts and strollers while loading groceries and toddlers into their vehicles. The same is true when loading large items into a vehicle at a home improvement, furniture, or electronics store. This requirement provides a convenient and comfortable experience for our residents and guests who patronize our local businesses. The following figures show typical dimensions for parking lots in the City of Glendale.

## ANGLED PARKING

PARKING ANGLE	STALL WIDTH	STALL DEPTH		DRIVEWAY WIDTH'	
				ONE-WAY	TWO-WAY
30°	10'	19.25'	15'	11'	23'
45°	10'	21.5'	18'	13'	23'
60°	10'	22.5'	20'	18'	23'

\*20' MINIMUM WIDTH WHERE FIRE DPT. ACCESS IS REQUIRED
